David Mauricio Gorraiz Moreno

BACKEND SOFTWARE ENGINEER JUNIOR | SECTOR FINTECH & SAAS

Backend Software Engineer | Java & Spring Boot Specialist | Fintech Transactional Systems | Database Engineering.

www.linkedin.com/in/david-mauricio-gorraiz-moreno | +(57) 3157692102 | dmgorraiz@gmail.com | Tunja

PROFESSIONAL SUMMARY

Backend Software Engineer specializing in the development of scalable architectures for SaaS and Fintech transactional systems. Expert in the Java ecosystem (Spring Boot) and critical data management with Oracle 19c and PL/SQL. My focus is on building highly available REST APIs with robust security based on RBAC and automated auditing systems that ensure full traceability of financial information. Proven ability to design data models that eliminate redundancy and optimize persistence in high-traffic environments.

SKILL STACK

Java (Spring Boot) | Oracle 19c (PL/SQL) | Python (Flask) | Microservices Architecture | RBAC Security | ACID Transaction Management | PostgreSQL | SQLite | JUnit | Problem Solving Under Pressure | Emotional Intelligence | Adaptive Learning.

EDUCATION

- Certificate Program Backend con Java | 33 hours | Platzi | Tunja | 2025
- Certificate Program CS50x: CS50's Introduction to Computer Science | 50 hours | HarvardX | Tunja | 2024
- Graduate Program Database Specialist | Universidad Pedagógica y Tecnológica de Colombia | Tunja | 2024
- Undergraduate Electrical Engineer | Universidad Pedagógica y Tecnológica de Colombia | Tunja | 2024

PROJECTS

BACKEND ENGINEER - TRANSACTIONAL API ECOSYSTEMS

Platzi | Tunja | Sector Fintech | August 2025 - October 2025

Achievements:

- Designed a **REST API** with a focus on layered architecture principles that improved scalability and maintainability, enabling the addition of new features in under 2 weeks without impacting existing services.
- I developed an **automated auditing** module for real-time monitoring of database transactions.
- I performed technical testing of endpoints to ensure service **uptime** and stability throughout the development cycle.

DATABASE ENGINEER - HIGH AVAILABILITY SYSTEMS

UPTC | Tunja | Sector Fintech | January 2025 - February 2025

Achievements:

- I implemented a robust data architecture in **Oracle 19c** for managing critical records in high-demand systems.
- I wrote stored **procedures and triggers in PL/SQL** to enforce business rules at the data layer.
- I performed **data normalization** processes to optimize the performance of complex financial queries.
